- Depth upto 6 inches, 16 inches min width, 2-3 hours for one acre and 1.25 liter diesel.
- Saves 60 % cost in labour.
- Delivery Time: one month

Viswanatha Raju Easy Planter

In farms where plastic mulching is used, plantation is a laborious task. Cutting of plastic sheet, placing the plant, covering it with mud around it would place high demand on labour, effort and time.

Viswanatha Raju has combined all the three actions into one diece - Easy planter. This is operated by two persons- one for the device and the other for placing the plant inside the device thus saving on labour. The plastic piece cut by the planter does npt go into the soil as it hangs on to the mulching sheet (being cut only 2/3) thus contamination of the soil is completely eliminated. A very effective labour saving simple device for small and marginal farmers which surely contributes in reduction of farmer's investment.

R. Vishwakarma Sugarcane Bud Chipper

- Device to cut buds from sugarcane developeda by R Vishwakarma..
- Chipped buds can be sown directly in the field or grown in nursery.
- One can chip 250-400 buds/hour.

- A simple arrangement with an exhaust fan fitted upside down.
- Air sucked and pushed into a tub filled with water.
- Water traps the dust particles and the clean air moves back into the room.
- A poorman's health device.
- Clean air at affordable price.

TULASI

Effective for distruction
of virus and as a
growth promotor.
Pure organic
composition.

PERFECT

An effective organic
method against fly in
paddy Sucking pest,
white fly, Yellow fly and
Mealy bug in
cotton, chilli, vegetables

Pandu Ranga Rao Air Ceal Bike Tube ➤

In rural areas, when motor bikes go through punctures, riders face lot many difficulties such as pushing the bike for long distances, thus damaging the tube completely leading to its replacement rather than repair. At an average, one new tube per month is the requirement of a bike owner in rural areas. Panduranga Rao developed a solution which he pours in a new tube. This tube having fitted in a tyre is filled with air sufficiently. The bike fitted with Airceal tube in this manner does not get punctured for three years. Try by hammering nails on to a tyre fitted with Airceal. No punctures will be noticed. You can happily ride the bike with your family.

Thirupatirao Tree and Poll Climber

Labour to climbing coconut trees, Cement electrical poles is not available due to the drudgery involed and also being unsafe. Even often manually climbing all the up using ladder working at the top is dangerous. A very useful device, very simple to use and can be used or a personal tool for climbing coconut tree and cement electrical poles is developed by Thirupathi Rao. Round and rectangular electrical polles can be easily climbed with to separate devies. Children, Women and Elders can also c..... use these devices.

Climbing duly rainy season in also safely possible using thease devices.

Solar Fertilizing Dispencer by B Mallesh

- Ensures even and effective spray of fertilizer compared to spray with hand.
- Economical in consumption of fertilizer.
- Least effort, easy to operate.
- Weighs only 6.5 Kg
- Uses 20V Solar Panel, 1/4 HP motor, 12 V Battery
- Container capacity 17 Kg fertilizer.
- Spray of 17 Kg fertilizer 7-10 minutes.

Weeder with Scooter Engine by Balaiah

Two years of relentless work on many models by Balaiah - a farmer from Ramannapet village, Nalgonda Dist of Telangana State, resulted in an effective weeder for small and marginal farmers.

Being simple to operate and easy to maintain, farmers flocked Balaiah and placed orders for weeder. So far, over 80 weeders are already in use by farmers.

5 feet long, 20 inches wide weeder has its tyres filled with water for a smooth movement in the fields. Its operation is similar to that of a scooter - such as, kick starting, clutch and gear changing etc. Very user friendly and mainatnable in a village.

◀ **SRITAILAM** by Galla Chandra Sekhar
